CORE AI CAPABILITIES

AI Workflow Automation

Automate multi-step government processes with human approvals, exception handling and full audit trails.

Intelligent Document Processing

Extract, classify, validate and route information from forms, correspondence and emails automatically.

AI Knowledge Assistants

AI assistants that answer questions from approved departmental documents with source citations.

Generative AI Solutions

AI tools for drafting, summarization and knowledge retrieval with appropriate accuracy controls.

Citizen Service Automation

Resident-facing AI for inquiries, permit guidance and service requests using approved information.

Data Analytics & Reporting

Transform operational data into structured reports and dashboards for decision support.

Business Process Modernization

Identify, redesign and automate manual administrative processes to free staff capacity.

AI Strategy & Implementation

Assessment and planning support for government AI programs and responsible AI frameworks.

Professional Services / Subcontracting

Specialized AI automation expertise available to prime contractors on government assignments.

GOVERNMENT USE CASES

MUNICIPAL

311 AI Assistant

Resident questions answered from approved municipal information, with routing to staff for complex issues.

PERMITTING

Permit & Licensing Assistant

Guides residents through permits, licences and required documents based on their situation.

DOCUMENT MANAGEMENT

Document Intake AI

Classifies and routes forms, emails and correspondence with human review for exceptions.

INTERNAL KNOWLEDGE

Staff Knowledge Assistant

Employee Q&A from approved departmental policies and procedures, with source citations.

CASE MANAGEMENT

AI Request Triage

Categorizes and routes incoming service requests to the appropriate team for human decision.

ADMINISTRATION

Workflow Automation

Automates repetitive processes while preserving approvals, audit trails and human oversight.

RESPONSIBLE AI & SECURITY APPROACH

✓ Human oversight for decisions

- ✓ Role-based access control
- ✓ Full audit logging
- ✓ Data minimization
- ✓ Canadian data residency options
- ✓ Privacy-by-design
- ✓ Accuracy & hallucination testing
- ✓ Bias & risk testing
- ✓ AI provider transparency
- ✓ AIA support
- ✓ Incident response
- ✓ Configurable retention

TECHNOLOGY APPROACH

Technology-agnostic: AI models, cloud and workflow technologies selected based on client security, privacy, data-residency and integration requirements.

Microsoft Azure & Azure OpenAI

OpenAI
